Strategic Partners

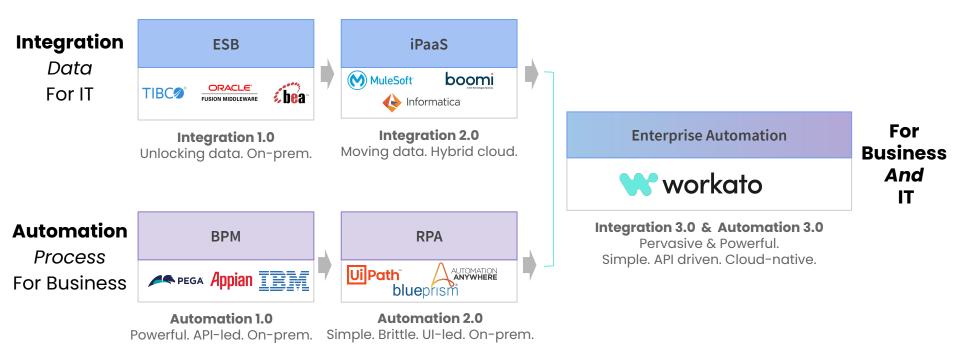

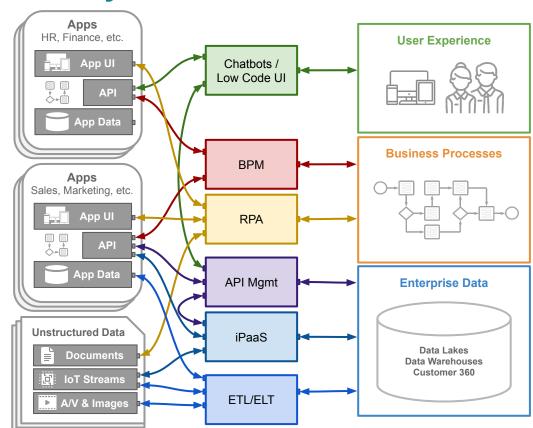

The evolution of integration and automation platforms

What is needed is a unified platform for Integration & Automation for Business and IT

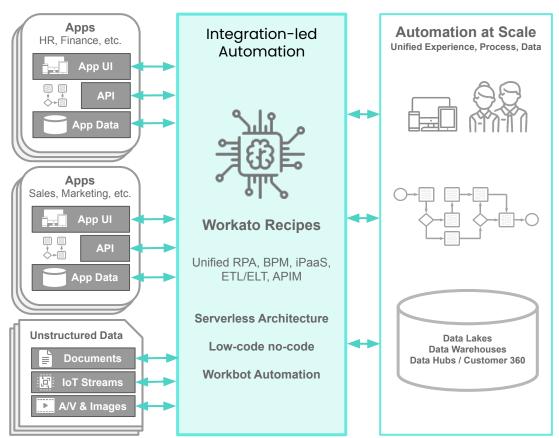

Complex Automation Ecosystem

- Too many tools
- Not enough resources
- □ Slow delivery
- No standards
- ☐ Frustrated stakeholders

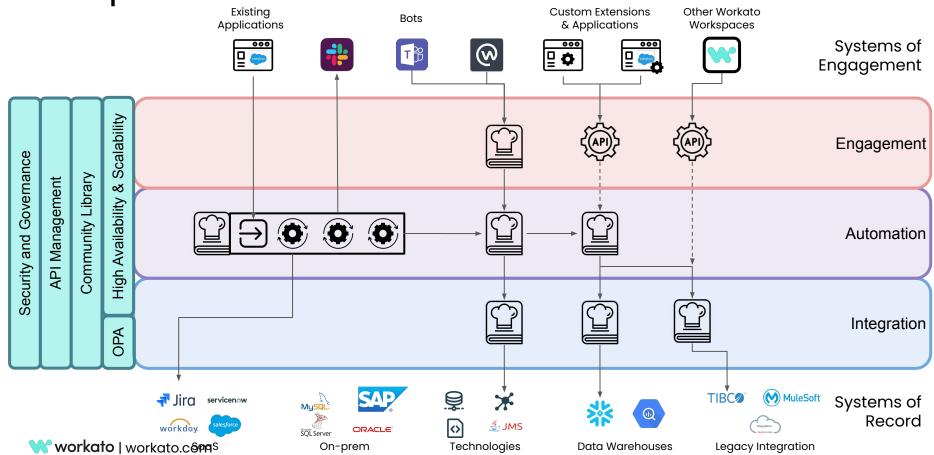

Single Platform to achieve automation at scale

- Simplified experience for your delivery teams
- Unified experience for your business stakeholders
- ☐ Faster time to market
- More business outcomes achieved

Recipe-based architecture

Recipes: Building blocks for Orchestration

Event Based

Real Time | Scheduled | Batch

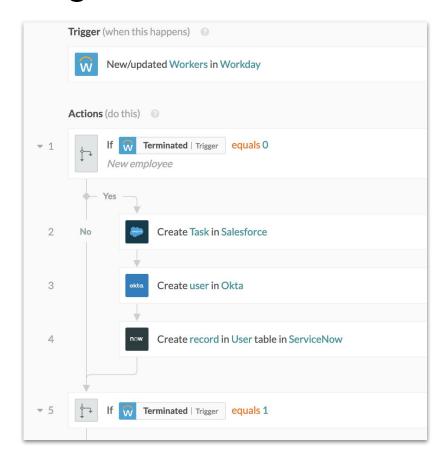

Powerful Logic

Linear | Branching | Looping | Try/catch | Error handling

Connect to Anything

Cloud | On-prem | Micro-services | Custom Connector SDK

workato | workato.com

Smart Connectors

1,000+ apps | Auto-dedupe | In-Sequence Delivery | No data loss

Low-code, Enterprise-grade

Community Recipe templates | Instant Deployment | Auto-scaling | End to End Data Encryption in Transit or at Rest | Data masking | Data retention control | Activity audit log with streaming
